

# HM4 Series

## Fixed-Mount Barcode Reader

HM4 Series fixed-mount industrial barcode readers are designed to provide customers with OEM product applications. High scanning performance for 1D Linear and 2D barcodes reading.

With its compact design, It can be easily embedded into various devices as a barcode reading component application, such as ATM, Kiosk, Ticket Checker, Vending Machine, ICT Fixture and more.

## Reliably Reads 1D And 2D Codes

HM4 is equipped with high performance scanning engine that reliably read 1D liner barcodes, 2D barcodes and some DPM (direct part mark) codes.

## Powerful Decoding Algorithm

Carry the powerful algorithm which can also decode barcodes with variations in contrast, blur, damage, quiet zone violations, and perspective distortion.

## Fits Into Small Application Spaces

HM4 is small enough to fit in the tightest spaces, and with IP54 rated housing, it can also handle the harshest environments.

## Optional Communication Ways

Providing USB or RS232 interfaces for selection, and also be able to customize RS485 and other more communication protocol interfaces.

## Applications

.Electronics:

PCB manufacturing / electronic components(micro chips) / ICT fixture / automation equipments and more.

- Automotive:

DPM code verification / components traceability and more

- New Energy:

battery manufacturing and more.
